Charles Darwin : A Naturalist's Voyage Round the World before purchasing it in order to gage whether or not it would be worth my time, and all praised A Naturalist's Voyage Round the World:

The Thinking Man's Adventure TaleBy PondbaggerThe book is a first-rate account of Darwin's fascinating voyage around the world in the Beagle in the 1830s. I always thought he stayed aboard most of the time as the ship circumnavigated the world; I never realized how much time he spent ashore, engaging in bold adventures in South America and other places. It is fascinating to realize the breadth and depth of his curiosity as he turns his mind to virtually everything he sees. At least in those years he was not the retired country

parson he is so often thought to have been. 2 of 2 people found the following review helpful. Wonderful, moving, relective
By kenneth scherer Although missing all the illustrations of the original work, this is a breathtaking book. It reads easily and takes you on a journey around the world as it is beheld by a most intelligent and good man. The conclusion was unexpected and was filled with many passive observations about life on earth, geology, our mortality and possibly our living souls too. A must read.

By LizCI read the Penguin Classics paperback version of this book years ago and loved it. This, however, is barely readable...not due to the content but because the text does not wrap properly on my Kindle unless I change the screen to landscape and use the smallest type setting. I suppose I got what I paid for given that it's free, otherwise I'd want my money back. The font is different from the standard Kindle font too. I would recommend spending the \$2-3 on one of the other Kindle editions.

A Naturalist's Voyage Round the World By Charles Darwin

About the Author Charles Darwin was an English Naturalist who became famous from his book, *The Origins of Species*, which spoke of his theories of evolution. His voyage of the *Beagle* began in 1831 and lasted almost five years, as he traveled the world studying natural history, geology, and different animal species.
