Fewer words and more hikes would have been better, but this is good and accurate. You will not get lost and if you do not know L.A. you can see some amazing things.4 of 4 people found the following review helpful. Exactly what we were looking forBy Gregory JohnWe've just started hiking and this book was exactly

what we were looking for. It has a large variety of routes, all the relevant information, clear descriptions, good maps, and a very easy to read format. My only wish would be a summary of all 192 trips so we could quickly scan for specific criteria like difficulty and time.0 of 0 people found the following review helpful.
