A good friend and I thru-hiked the Robert Frost Trail with ...By Joshua DickmannA good friend and I thru-hiked the Robert Frost Trail with this guide. It has decent trail descriptions of alot of hikes through the Pioneer Valley. Some information we found to be misleading, but they were very minor details. The description we followed was never wrong. It's a reliable source. I cannot speak for the Eastern end of the state, but I think I can trust it's ability to give a relatively accurate description of what I'd expect on each hike. My edition came with two paper maps of the Holyoke/Mt. Tom ranges here where I live. Mt. Watchusset, Everett, Blue Hills, and Greylock are included as well. They'll make good hard copies to print from.2 of 2 people found the following review helpful. Lots of good hiking right in your own backyardBy John RothWe are totally happy with our new AMC Massachusetts Trail Guide. We are making a list of new hikes, some of them close to home that we had completely overlooked. We like the trail commentaries and the maps. Of course the real test will come as we hike the hikes and follow the trail guides.1 of 1 people found the following review helpful. Great guide for the pocumtuck trail in western MABy Rory MiskimenWe used this guide to hike the whole length of the pocumtick trail from Mt Sugarloaf in S. Deerfield, to Canada Hill in Greenfield, breaking the walk up into 5 easy hikes. Although the guide doesn't have a map, the written instructions were very accurate. We were amazed that such a scenic trail was right in our backyard almost. Looking forward to more hikes from the guide.
