It's what I was looking for, a simple way to track where we are. We're going south, so we can start at the last page and track our progress going south by flipping forward.Thanks!I love the National Geographic maps. However, when this one arrived, the booklet wasn't printed correctly. It was actually missing three maps in MD which I plan on hiking. A few others were out of order. Is it possible that I can reorder this and get one that's printed correctly?0 of 0 people found the following review helpful. Good buyBy gregoryThe maps are very easy to use and provide useful information of things along the trail and even marks campsites with no fire allowance. Overall good but that can definitely help you find your way up or down te AT. Will be using these on the trail in the near future.
