Identified plenty of wildflowers in the Spring but the guide falls way short of being comprehensive the drawings (not photos) make identifications dubious. Nevertheless, I know of nothing better that's this light weight. Wouldn't leave home without it when going on a hike. Same guide sold near Big Sur trailheads for the same price. 0 of 0 people found the following review helpful. Great little folding pamphlet. We love it. By marvin These little folding guides -- we also have the birding one for NorCal -- are awesome. Lightweight but printed on durable thick paper with a plastic like covering. They don't have every animal or plant but they have the major ones. Just what you want on the trail. Useful but won't slow you down. And then, when you get back to civilization, you can look stuff up in a book or online and get all the details. 0 of 0 people found the following review helpful. Five Stars By TdenGreat
