A couple of years ago, I got involved in creating the (currently stalled) Albuquerque Urban Trail--a proposed long-distance hiking trail that would run from the volcanoes on Albuquerque's west side to Sandia Peak on its east, zigzagging for over 200 miles into its every district along the way--and this was the map used to plot it out. This map was perfect for the job, too, because of its detail and its completeness. It's a good map, and because of my work with that trail I've bought nearly a dozen copies of it. I'll just say this: if you need a map of Albuquerque, then get this one. I can almost guarantee it will be more than sufficient for your needs. All the streets are here, the arroyos, the parks, the geographical features, and it's well-indexed and laid out. It's good. You'll like it.
