There are better choices for trip planning and travel in UtahBy WinterIt has its good points but overall the bulk of the book is devoted to where to stay and where to eat with less information on what to see and do in the state. Tripadvisor and yelp are more useful for food and lodging and the guide books should be written to provide information on where to go, best times, tips for travelers, and possible problems one may encounter, and this is where Fodor's Utah fall short.The Moon book on Utah is much better.7 of 8 people found the following review helpful. FODORS: NECESSARY BUT OFTEN WAY OFFBy PATOUWe used Fodors as a companion with 50 Best Short Hikes in Utah for a three week trip hiking the national parks and visiting the state. Although the book was extremely helpful with respect to history and locations and the book turned out to be an excellent, couldn't live without guide, be careful of the restaurant and some of the hotel information. We disagreed often with several of the authors' reviews and towards the end of the trip, felt not only misled but really angry because the guide had sent us there. After a day of hiking, most people are really hungry and looking for great eats..in this case, Fodors DID NOT DELIVER..We finally stopped using it and asked locals to rate.. FODORS UTAH needs a serious upgrade on the restaurant tip and should consider hiring new contributors for this important piece since from our research and experience, food is becoming big business in UTAH with foodies like us considering the state as a soon to become destination.0 of 0 people found the following review helpful.
