Hard to find though!!By Adrienne FuocoI ordered this for my older son as a few months ago he started a job with delivering auto parts for a huge company. Well it is local but but if you do not do a lot of driving to other districts you can lose a lot of time not knowing side streets to cut down and a gps always takes you out of the way and some times will put you on an expressway when you do not even need to go that way. Did anybody ever try and find a map these days? it is not easy. No one sells them anymore or atleast for months I have been looking and can not find any. For awhile I was trying to print out maps on paper but before you know it I had a book and nothing was in order and was hard to find what he was looking for. So if you have a driving job and are not familiar with all areas than something like this is a perfect add on to a gps system.2 of 2 people found the following review helpful. Easy to useBy Alison PrattEasy to use, well marked with enlarged areas as call- outs. Gps is only so good, you need a full birds eye view of an area to get your cognitive map set in your head.0 of 0 people found the following review helpful. Five StarsBy JBRGood map...easily read!
