Muench is a craftsman but not necessarily an innovator. . I would recommend Charles Bowden's Stone Canyons of the Colorado Plateau for an enhancement of what Muench presents here. 9 of 9 people found the following review helpful. Breathtaking photos of the Colorado plateau By Angel Lee This book offers a breathtaking view of the Colorado plateau. The full-page color photos are so incredibly vivid they almost jump off the page. It really makes you feel like you are there. You get a look at towering mountains magnificent nature made stone sculptures. Cascading waterfalls, meandering streams, peaceful snowscapes, brilliant autumn leaves,

beautiful flowers endless skies take your breath away. Muench is a master at capturing detail and light, and this setting shows off his talent to the maximum. A narrative by James Lawrence provides a history of the area and conveys the feelings inspired by this natural wonderland. Some images have small quotes poems under them. In the back, each photo is shown in miniature with comments from photographer and technical details. This book provides a beautiful world to get lost in. 17 of 18 people found the following review helpful. A beautiful book with slight flaws By William R. Lane This is a gorgeous book of southwest photographs. It has many examples of how to take great photographs. An interesting feature is the photographers comments about each photograph, found in the back of the book. There are only a few flaws in my humble view. Some of the photographs were printed with very exaggerated color saturation. This is painful in some cases. Another problem is Mr. Muench's use of a split density magenta filter for several of the photographs. He tries to give the scenes a warm glow but the magenta color looks totally fake, especially when one sees it only across the top of the photograph. Please throw that split density magenta filter away and let the southwest present its beauty naturally. Still a great and valuable book to own.

The Colorado Plateau is a land rich in red sands, chocolate crags, eternally translucent skies, and stunning canyons. The region inscribes the deserts, mountains, rivers, and high mesas of the four corners of Utah, Colorado, New Mexico, and Arizona. David Muench has walked this land---the Grand Canyon, Zion National Park, Canyon de Chelly, Bryce Canyon National Park, Mesa Verde, Vermillion Cliffs Wilderness, Grand Staircase / Escalante National Monument --- and has returned with the unforgettable images that are presented in this book.

About the Author David Muench is a master professional photographer whose work has become a benchmark in American landscape photography. David's photographs have appeared in with more than fifty books and countless exhibits, magazine articles, and calendars. The Colorado Plateau is one of David's favorite places to photograph the American landscape. David lives near Albuquerque, NM.
