It's a fold-out map book of the whole state. I'm keeping it as a back-up in case my GPS stops working. Keep in mind this is the 2009 version, so (as of Mar 2015) it's 6 years outdated. Most roads do not change too quickly, but if you will be travelling in a transitional area, just keep that in mind.1 of 1 people found the following review helpful. You should have, even with GPS.By Steve 55Rand McNally has been around forever and does, for the most part, a nice job. I'm still confounded by the lesser roads that they choose to show or not show. As far as major highways, rivers, mountains, etc., they're great and will always get you to at least ballpark where a better local map can usually be found. They've always been my go-to map when planning a trip.4 of 4 people found the following review helpful. A good map for a driverBy Bill HenslerIt's not bad. I got a better map from the Montana Department of Transportation. However, this map is a little easier to use when driving because IT'S NOT HUGE. The other map - if it was made from cloth - could be used as a small bed sheet. So, I give it 4 stars. It's just fine for the job.
