Although, with how often new amazing culinary venues are opening up, it makes the book slightly out of date.Other than that, it's a GREAT book- especially when you have two indecisive people around dinner time :-)

I'd Rather Not - PortlandBy Solon GalStunningly lovely photos of the goods at the shops they review - but the text is printed in a light gray ink and such a tiny font that it is very difficult to read. "rather Portland" is divided geographically and purports to detail restaurants, shops, and local sights of interest. The maps of the specific areas look good - I'll know better after I actually visit Portland. I had purchased this relatively small book - 6" x 6", 189 pgs - thinking it would be easy to tuck into my bag while traveling. The fact that it is so hard to read means that I subsequently felt it necessary to buy "Frommer's Portland" - and Frommer's is the one I want in my bag while I'm walking the streets of Portland.

Sleekly designed and focusing exclusively on locally owned restaurants and stores, these modern city guidesformerly known as the eat.shop guidesare unique in both form and content. With the goal of supporting a culture and economy that value well-crafted experiences, they offer travelers and locals a colorful, compelling new lens for viewing a city.

Each featured business is hand-picked by the author to represent the crme de la crme of cities beloved by both locals and tourists. By including only the most unique independent eating and shopping establishments, the books present a fresh and unexpected look at each city, highlighting an exciting array of neighborhoods. The convenient size is ideal for bags and purses, while the beautiful design, luscious photographs and personal observations work together to tell a vivid, distinctive story of a city.

An review: "Well being from Vashon Island, off of Seattle, we must say this book is a must! We LOVE Portland, and visit as often as possible....just by chance we found this book. We spent four days running around visiting as many places as possible,(from the book) and had an absolutely incredible time. Finding just about all of them, the only negative aspect of the book, it needs a better map system.....you will still need a good map to find out where you are and where you are going, otherwise no complaints at all. She could put a fold out map in the book and have it made. The restaurants were still delightful and the folks who own these spots were terrific. Another great point is NO advertising! She sussed out these places and wrote about them, period! I can say that over all the many years I've been to Portland, this book in hand made it one of the best ever.....we even bought the book on Seattle, just to find something new and original in our own home town, Portland still beats Seattle by a long shot! But hey, it's all a matter of opinion, right?!"
